

Why choose online speech and language therapy and who is it for?

Speech and language therapy is for anyone who has speech and/or language-related problems. People learning English as a second language may find it difficult to pronounce sounds such as "th", "w" or "ae". Not being able to communicate well has a major impact on the quality of life. The speech and language therapist makes language sessions and exercising fun and easy with the help of digital games and videos.

Are you or do you know someone who ...

- finds it difficult to pronounce certain sounds?
- is not confident about their pronunciation or language abilities, which make speech unclear?
- can't hear the difference between certain sounds?
- finds long words and/or sentences difficult?
- has limited vocabulary and difficulty with making sentences?

Then TinyEYE speech therapy is the right solution!

Is it reimbursed?

Ask your health insurance company if online speech therapy is reimbursed. If you want we can also assist you with this.

How does online speech therapy work?

Online speech and language therapy works on a laptop or tablet. The client and the therapist can see and hear each other via the TinyEYE website.

The therapy can take place anywhere and at any time.

The digital exercises that the client receives, can also be practiced independently after each session.
