

## A special program for adults who want to further develop their language skills.

The language specialist can map out which skills the client has difficulty in such as reading and/or spelling. Once the level is determined, a treatment plan is created together with the client. Think of exercises related to functioning at work, or the ability to properly understand written information. In addition, we provide tips that can be applied in daily life.

### What is the approach?

TinyEYE offers an evidence-based online program for the treatment and practice of language problems in adults. The TinyEYE software program is carried out by experienced TinyEYE language specialists.

They work online with clients who want to improve and develop their language skills.

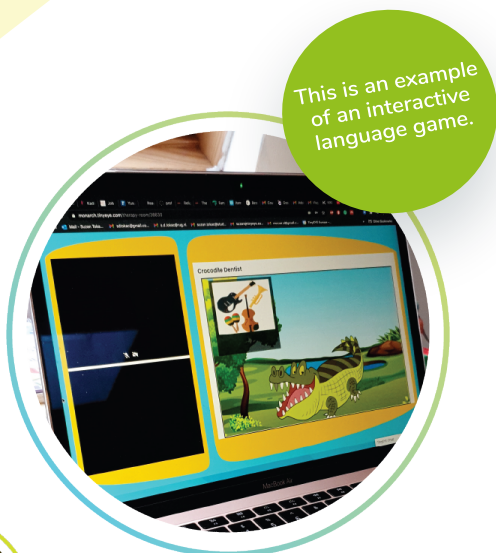

### How does it work?

The client and language specialist log in via the TinyEYE website; [www.tinyeye.eu](http://www.tinyeye.eu) for a live session where they can see and hear each other. The language specialist presents the exercises on the screen.

The TinyEYE language specialist works online with special language games to expand the vocabulary in a playful way.

### Unlimited, free homework environment

There is also unlimited use of the language exercises in the TinyEYE homework environment. The client can work on the treatment goals independently or together with someone else at any time. The speech specialist also leaves video recordings and personal messages in the homework environment.

### More information?

For more information, visit our website [www.tinyeye.eu](http://www.tinyeye.eu). You can also contact us via [info@tinyeye.eu](mailto:info@tinyeye.eu).

Hi! My name is Elisa.
