

## Why choose TinyEYE online speech therapy for your child?

### A unique speech therapy solution for your child.

TinyEYE offers children of all ages the opportunity to receive speech therapy online, in the comfort of their own environment. Speech therapy is not dependent on time and location anymore! There is no need to travel to the therapy center. Start the online sessions wherever you want.

#### How does it work?

- Our speech therapist connects with you and your child through TinyEYE. All you need is a laptop/tablet, webcam and WIFI.
- You receive personal login details to access the TinyEYE software.
- In the software, you hear and see the speech therapist via built-in live audio and video. The speech therapists use a range of speech-language games during the sessions, adapted to the level and needs of your child. TinyEYE works on speech and language development in a playful way.
- After each session, the speech therapist places the games with instructions in the online homework backpack. This way you can practice at home with your child. The speech therapist also leaves instructional videos and personal messages in the homework. Your speech therapist is available 24/7!
- The progress of your child is available for you to check after each session.

#### TinyEYE takes speech therapy to the next level

All TinyEYE speech therapists are registered paramedics and work according to the most recent standards.

#### Safe online

The TinyEYE environment is secured. You have your own password that gives you access to the software and the homework backpack.

#### What are the costs?

TinyEYE has a contract with the Dutch health insurances which means the online sessions are fully reimbursed for children up to 18 years of age.

#### More information?

For more information, visit our website [www.tinyeye.eu](http://www.tinyeye.eu). You can also contact us via [info@tinyeye.eu](mailto:info@tinyeye.eu).
