

How does it work?

TinyEYE offers children of all ages - wherever they live - the opportunity to receive speech therapy online, in the comfort of their own environment or at school. Speech therapy for a child becomes time, time and place independent.

Our speech therapist connects with the parents and the child via TinyEYE. All parents need is a computer with a webcam and wifi. Parents receive personal login details to log into the software.

How do you start?

1. First online meeting

We answer all questions in a personal conversation. Feel free to contact us via the information below.

2. Go through and prepare everything

We ask for permission from parents to participate in the online Speech Therapy Scan. We do a technical check.

3. Planning and execution of the online Speech Therapy Scan

We determine together when the scan takes place.

4. We discuss the outcome of the scan

We indicate which children need speech therapy.

5. Preparing Speech Therapy

We consult with the parents, they give formal consent to therapy through a treatment agreement.

6. Start therapy!

Easy login. 20 minutes of live sessions with games keep it fun. After each session, homework with games is given to practice in a fun and playful way. We will always keep you informed. Teachers and parents can always see what the speech therapist has done.

Advantages of online speech therapy

Excellent care

- Online screening through the TinyLanguageTool
- Treatments aimed at articulation and communication problems in multilingual children.
- Parental advice (indirect therapy).
- School themes are also included in speech therapy.
- We specialize in multilingual speech therapy and have native speaker speech therapists.
- TinyEYE offers speech therapy in Dutch, English, German, French, Turkish, Spanish, Farsi, Russian and Hebrew.

Available 24/7

- Always a speech therapist at your disposal.
- Efficient working method.
- Our speech therapists can be arranged very flexibly.

Quality control

- All TinyEYE speech therapists are quality registered.
- All TinyEYE sessions are secured.
- Our speech therapists work according to the latest standards.
- There is a strong collaboration between teachers, speech therapists and parents.

Extremely Effective

- By practicing a lot with the speech and language games the child will progress quickly.
 - There is an accessible TinyEYE homework environment for the home, which increases the English language offer.
 - TinyEYE's homework module also ensures that knowledge from the live sessions at home can be applied for rapid progress.
- TinyEYE has been proven effective by Kent State University <https://blog.tinyeye.com/tag/kent-state-university>

Paid in full

- In most of the countries (including Netherlands) speech therapy for children up to 18 is covered by their insurance. Depending on the country of residence and families' insurance coverage, our services MIGHT be fully reimbursed. But only if your medical insurance covers online speech therapy. It is also possible to arrange to receive our services based on an agreed quotation. For details please contact us.

Hi! My name is Elisa.
